A Matched H2-only controls
Raw control
Background-subtracted
Control m/z = 3 (10−11 mbar)
H2 signal (10−8 mbar)
B Bias at the same H2 signal
αtrue = 2
αtrue = 5
αtrue = 10
αtrue = 15
αtrue = 20
Downward bias in separation coefficient (%)
H2 signal (10−8 mbar)
C Effect on the reported value
No added interference
Observed control range
Median across controls
Apparent separation coefficient
True separation coefficient
